Attractiveness of the country and city your university is located in:

Both cities are surrounded by countryside, forests and water and everything is close at hand. Växjö has been declared “the Greenest City in Europe” because of its focus on environmentally sound solutions and the environmental programmes implemented. The learning environment is characterised by an active student life with teaching and research staff in close proximity to students. Many of our international students mention the informal relationships with the teachers as one of the things they appreciate most as students at Linnaeus University. Other aspects that receive praise are the modern and environmentally-friendly buildings.

Available student life support during the exchange:

University life has much to offer, from meeting up with friends at the student pub to attending events and cultural activities. The student union and the student associations are doing their best to make you feel at home by organizing local events such as barbecues, sports activities and theme nights with typical Swedish traditions represented

Opportunity of interaction with other students:

The buddy program matches international students with (mostly Swedish) students. The buddies help the international students with day to day questions, introducing them to Swedish culture and way of life as well as what it is like being a student at Linnaeus University.
